Destaco’s Robohand products are designed for safe and efficient handling of materials in hazardous or sterile environments. Destaco’s gloveport systems and telemanipulators allow human operators to safely perform dexterous maneuvers in environments where the human operator cannot have direct contact. These products are designed and machined for precise repeatability, durability, and long life to ensure maximum production uptime. Destaco’s Robohand products are engineered for reliability and exceptional clamping forces, holding capacities, and durability. Our expertise and complete portfolio of products allow us to develop products that will provide you with a competitive advantage in the marketplace. Robohand’s rotary indexers and conveyor systems offer human operators to safely perform dexterous maneuvers in hazardous or sterile environments. Robohand’s CRL products are designed for safe and efficient handling of materials where the human operator cannot have direct contact.
